

CS 492/493 Progress Template:

Instructions: *Each team member should enter their activities performed for the capstone project in the last two weeks, as well as their expected activities for the next two weeks, along with anything holding them up on completing their activities. These should be discussed by the team and their advisor(s) during the weekly/biweekly meetings, and the advisor(s) should sign and date the sheet indicating a correct assessment of the team's progress. This needs to be scanned and uploaded to moodle. **200 words minimum per team member required for credit across the three questions.***

Team Member #1: Lindsey Wingate

What I did since last progress report:

Since my last progress report I built new pages for the "about home" page and also began working on a page to display the evolution of the project and the students pictures. I have a design plan done for these pages.

Anything holding me up on my last progress report's expected activities:

I was put back a little by the layout of the NDAAtlas server. They use AngularJS instead of PHP, which will just take some getting used to. Also, I have to navigate the code of the team before me. Luckily I know Marshall, a student that previously worked on the project, and he provided insight on what the code was used for, etc.

What I plan to do before the next progress report:

I plan on having everything on the csgrid server moved over to the NDAAtlas server.
